SECURITY & ELECTRONIC TECHNOLOGIES GESMBH

Security & Electronic Technologies GmbH

Secu-Tech GmbH is a global supplier of intrinsically safe and fail-safe wireless data-transfer systems, radio-controlled fill- and overflow-protection systems for single-tank and multitank-use, industrial RF remote-control- and dead-man systems as well as level measurement systems usable for all kinds of liquids and bulk cargo.

SECU-DATA offers high-accurate wireless data-transfer from ex-zones to non-ex-zones, f.e. to control rooms. Interfaces offered: RS232, 4-20mA, Relais, TRbF; IP68 protected; range: up to 1 to 4 km; ATEX-certificated.

SECU-Multitank offers high-tech solutions for multiple tank-refuelling – up to 8 tanks in parallel - using patented multiplex-multimeasurement-technology combined with the advantage of overflow protection, cross-over prevention and earthing control. SECU-Multitank = enormous productivity-increase and cost-savings.

LRC-systems, the radio-controlled fill- and overflow-protection systems used for single-tank-refuellings in ex- and non-ex-zones offer 100% overflow-protection and remote control features.

LC-100, contactless level-measurement system for measurements diesel/oil offers a lot of features for a very competitive price.

All our products are ATEX-certificated and mostly used in petrochemical and chemical terminals, tanker-trucks, bunker-ships, bunker-stations, airports, mobile or stationary wherever efficient and safe refuelling-procedures are obligatory. Our customers are the petrochemical-, mineraloil- and chemical-industry worldwide.

Equipment

- Air Water Oil and Service Units
- Depot/Storage Equipment
- Environmental Protection Systems
- EPOS, Forecourt Control and Station Management Systems
- LPG Equipment
- Pumps/Dispensers and Components
- Security
- Tanks and Pipes
- Tank Truck/Transportation Equipment
- Robotic Refueling Equipment

Services

- Engineering & Construction of Petrol Stations, Depots and others
- Environmental Services
- Fuel and LPG Management and Dispensing Services
